

**Submitting to European Biophysics Journal for the Special Issue showcasing Interdisciplinary Science in Turkish Biophysics, associated with the 6<sup>th</sup> International and 34<sup>th</sup> National Biophysics Congress.**

A deadline for submissions has been set of 25 February 2025. If you think you will need longer to complete your submission then please email [ebj@bioch.ox.ac.uk](mailto:ebj@bioch.ox.ac.uk), with the subject title “SI: Interdisciplinary Science in Turkish Biophysics”.

1. Log on to Editorial Manager accessed via the journal’s homepage:  
<https://link.springer.com/journal/249/volumes-and-issues>  
Direct link to submission site:  
<https://www.editorialmanager.com/ebjo/>
2. Click on [Submit new manuscript](#)
3. Choose article type: “Special Issue: Interdisciplinary Science in Turkish Biophysics”  
Articles of a wide variety can be submitted – research articles, biophysics letters (shorter, focused studies), methods articles, review articles and technical primers, which take a key biophysical technique and summarise its theoretical and practical basis and how it can be applied to answer biological questions. Please make submissions as full articles, not abstracts only.
4. Upload your article files. These can be submitted as a single Word file with figures embedded, or as a Word file with figures uploaded separately (select file type “Images”), tables may also be submitted within the main text or as separate files. You may also upload a LaTeX document, or a PDF of a LaTeX submission with the source file submitted as a supplementary file. Please note however that a PDF alone (whether generated from Word, LaTeX or another system) cannot be processed further and source files will be required before your paper can be published. Supplementary Information files of, for example, supplemental figures are also welcome.  
Matching guidance is provided on the file upload page.  
Also see: <https://www.springer.com/journal/249/submission-guidelines#Instructions%20for%20Authors> [Manuscript%20preparation](#) but note that these are for guidance only and are a combination of journal-specific and generic publisher guidelines.
5. On the next page select your 4 classifications.
6. On the next page please suggest reviewers – you are strongly encouraged to do this. Please try to avoid selecting close associates or recent collaborators.
7. On the next page please indicate any specific comments you wish the journal office to be aware of. These could include a covering note.
8. On the next page you will be asked to insert specific information about your article, including: Title, Abstract (no more than 250 words), Keywords, details of Authors and any Funding information.
9. When you have completed these details please submit the article for PDF generation and then confirm submission.
10. On submission your article will be received initially by the Journal Office, the Managing Editor will then forward to one of the Guest Editors for handling for peer review. **The Guest Editors are:** Professor Ayşe DEMİRKAZIK ([dmrkzk@yahoo.com](mailto:dmrkzk@yahoo.com)), Professor Mete ÖZCAN ([mozcan@firat.edu.tr](mailto:mozcan@firat.edu.tr)) and Professor Ferhan ESEN ([ferhanesen@gmail.com](mailto:ferhanesen@gmail.com)).

11. You will not need to pay for submission or for figures, whether grayscale or colour. The only charges that should be required are any **necessary** Open Access charges. Concerning Open Access:

a. **Your institution and/or funder may already have a transformative agreement with SpringerNature which means there are no Open Access charges for your paper which you need to pay.** See:

<https://www.springernature.com/gp/open-research/oa-agreements/turkey>

You can then publish your paper Open Access (“Open Choice”) **without any charges.**

b. **If you are not covered by the Turkish transformative agreement with SpringerNature and your institution and/or funder(s) do not require “Gold” full Open Access** then you should **self-archive** your paper for non-subscription distribution in PubMed as well as in any institutional archives. You should deposit the final submitted and accepted PDF of the paper and will be asked by SpringerNature to transfer copyright which is their standard policy for self-archived papers.

c. **If you are not covered by the Turkish transformative agreement with SpringerNature and your institution and/or funder does require “Gold” full Open Access,** then the additional costs will need to be borne from the authors’ research expenses or covered from a specific fund including those that may be provided by research councils or institutions.
